

Joey will be helping us hand build a platter on Saturday. Clay will be provided. You should bring three to five cone 6 bisque pieces to practice glazing strategies on Sunday. Given his technique plates and big bowls are good options.

We will have some bisque ware available the day of the workshop for purchase. Please let us know ahead of time how many pieces you will need to buy.

Students will also need to bring their own standard clay tools including wire, ribs, and fettling or other clay knife. Students will need a respirator or at least decent paper mask for glazing on Sunday.

All thrown pots will need to be on bats as we will not be able to lift pots directly off the wheel heads.
